

Hitachi Sumitomo Heavy Industries Construction Crane Co.,

「bauma 2010」 Preview Information

Hitachi Sumitomo Heavy Industries Construction Crane Co., Ltd. (hereinafter referred to as HSC), based in Tokyo Japan, will exhibit two crawler cranes at “Bauma 2010” in Munich, on April 19-25.

HSC will be a stand (1105/2) with its sister company, Link-Belt.

Stand No. F11/1105/2

Models

6000SLX

Luffing Tower Crane with Long mast

SCX2000A-2

Lift Crane

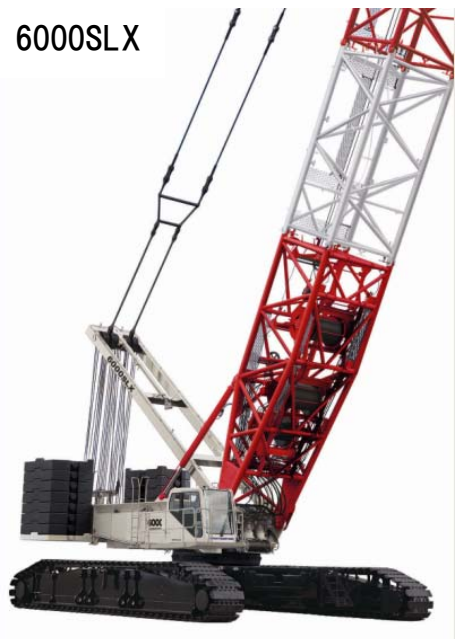

The 6000SLX is a new 550-ton capacity crawler crane with a super lift attachment.

The 6000SLX is suitable for growing demands of large projects in the world, including oil refinery, nuclear power plants, wind turbine construction and the like.

The wide range of boom configuration enables to fit various kind of work conditions.

The transport width of all units is 2,990mm and less for easy transport.

Moreover, self-assembling/disassembling device allows for faster and safer operations.

Another model at BAUMA is the new 200-ton capacity SCX2000A-2 high-performance and high quality crawler crane.

SCX2000A-2

A 272kW (370PS) powerful engine and 245kN (25t) high line pull winches in the compact body provides efficient operation.

Moreover, the well-evaluated “Quick draw system”, equipped for our upper class and the Counterweight self removal device offers easier assembly and better transportability.
